# Adobe Acrobat DC

## Check PDF accessibility

Available in Adobe Acrobat Pro DC only

Learn how to check if your PDF is universally accessible to people with disabilities. This includes access by people who are mobility impaired, blind, low vision, deaf, hard of hearing, or who have cognitive impairments.

Accessibility check

1. Select **Accessibility** from the Tools center or right-hand pane.

2. Select **Accessibility Check** in the right-hand pane.

3. Select a category from the dropdown and items from the checklist.

Leave every box checked for a complete report.

4. Select **Start Checking** to begin the report.

The left navigation pane opens to show the report results. Expand a section to see the details.

You can also use the Make Accessible action in the [Action Wizard tool](#), which walks through a basic set of steps to create an accessible PDF.

Fix accessibility issues

In the accessibility report window, right-click on an item to bring up the context menu. The context menu for any item that failed the accessibility check gives you the option to fix the issue.

Please note: some issues cannot be fixed automatically and need your manual intervention to correct the problem. In those cases, Acrobat presents a dialog box telling you what to correct.
